Welcome!

Milestone 0
JS recap

Marga Lensen

Outline

01 Warm-Up

Check in & “background check” 🤓

20 min

02 Setup

10 min

03 recap of JS basics

30 min

Data types, objects, arrays

04 Break

10 min

05 JS for React

45 min

methods, functions, DOM manipulation, localStorage

06 JS for React contd.

Next class

promises, asynchronicity, fetch API

01 Warm-Up

Check in & “background check” 🤓

01 Warm-Up

Where do we stand?

📊 Let's take a poll!

01 Warm-Up

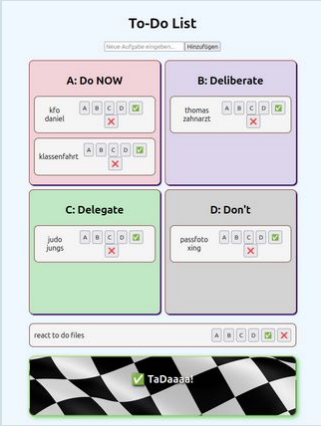
How far do we go in web design and functionality ...

... using HTML/CSS and JS?

... before we need React?

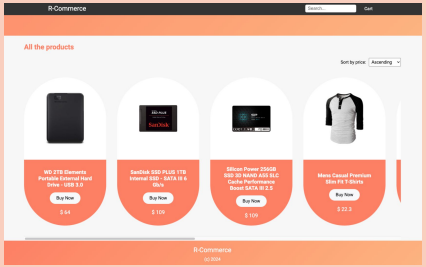
Course Topics - 2 structuring projects

HTML/CSS with JS



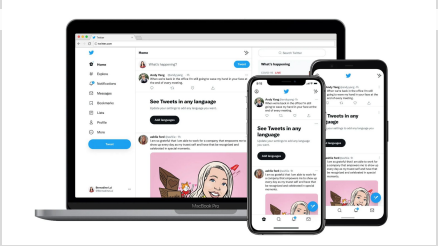
Websites and web apps with responsive design, animations, interactions on the site, fetching data by APIs, persistence with localStorage…

React



Build an e-commerce with product listing, shopping cart, and dynamic filtering.

Full-stack web-app



Create a **clone of Twitter** with tweet functionalities, user interactions and real-time updates

02 Setup

Hardware & Software to use

02 Setup

We will use **VSCode** and **GitHub**

- Visual Studio Code is a Code Editor
- GitHub is used for version control of your projects (repositories - “repo’s”)

03 Recap of JS basics

Data types, objects, arrays

02 JS basics

- Data types
- Objects
- Arrays, spread operator
- Array methods
- ... (to be continued)

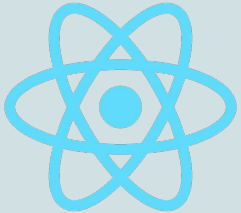
Break!

See you again in
10 Minutes 😉

surprise inside

03 JS for React and Next.js

Methods, functions, promises, asynchronicity



05 JS for React

- DOM manipulation
- Promises
- Asynchronicity
- Fetching API
- ... localStorage, JSON to be continued...

surprise inside

Final questions?

❗ let’s make a group picture 😁
